May 1, 2021

Dear Mission Partner:

The Anchorage Gospel Rescue Mission has been serving Anchorage's homeless and hungry for over half a century. Individuals and families have had their needs met, often under emergency circumstances, without the barrier of red tape. The Mission has done this with abundance, economy, and with the generosity of our caring supporters. We have accomplished this with a kitchen and dining area intended to serve a fraction of those who are seeking our help. We do all this with NO government funding of any kind.

Our current kitchen is approximately the size of a two-car garage, with food storage located in conexes outside of our building. The upcoming expansion will double our dining area (used currently in SHIFTS to accommodate all diners), increase the food preparation space, consolidate all food storage in the kitchen itself, and increase our meal serving capacity to over 20,000 meals per month. It would serve to provide needed space for the instruction of people in our LifeSkills program seeking to become proficient in the area of food service as a career.

On average, we serve between 7,500-9000 meals per month to anyone who is hungry. We serve families from the area who can successfully remain in their homes if the Mission provides them with a few meals a month.

Our current donor base has consistently covered our existing expenses, but for this capital project it is necessary to seek additional financial partnerships.

We welcome your partnership and financial support and thank you in advance as we move forward with our Mission to serve. We would love to answer questions, schedule a time for you to tour our facility and review our plan.

Thank you for your thoughtful consideration. We are humbled and honored to be helping the men, women and families in need in our great city.

Sincerely,

John T. LaMantia CEO
